

Summer Science Assignment

In pairs, find a news article that was published during the summer months (June - September 2018). Your article must be related to this year's Science Curriculum. Use the Course Outline, Textbook, your partner and other classmates to check if there is a link between your article and the curriculum.

Find 1 main article and an additional article that support the research findings. You will each read both articles, relate it to the curriculum, analyze & present your findings to your class.

Websites to get you started:

<https://www.popsoci.com/>

<https://www.sciencenewsforstudents.org/>

<https://www.sciencedaily.com/>

Create a short presentation in 'Google Slides' with the following:

- **Slide 1** – Title & Image to introduce the news/discovery
 - Effective & Informative
 - Include you and your partner's names
- **Slide 2** - What area of Science does this belong to?
 - How does it relate to this year's Science Curriculum?
- **Slide 3** – What is the news/discovery?
 - Summarize article with at least 3 points
 - Include at least 3 images on the topic
- **Slide 4** – What are the impacts of this news/discovery?
 - Explain with regards to: economics, ecology, politics, religion, society, etc.
 - Summarize impact in at least 3 points
- **Slide 5** - References
 - Author, title, source, date of publication, URL

Each student will submit their group's presentation slides onto Google Classroom for grading
